

WPT | WROCLAW TECHNOLOGY PARK

Wroclaw Technology Park

A growth partner for SMEs

Wroclaw Technology Park

Wroclaw Technology Park is a growth partner for SMEs, particularly innovative and highly specialised companies. It is a place where businesses develop technologies, create products and scale their operations using flexible infrastructure, specialist services and expert support. For nearly 30 years, we have operated as a business support institution, helping companies of all sizes grow. As one of the largest technology parks in Poland, WPT effectively connects science and business, creating a unique environment where hundreds of companies, from startups to global corporations, build their success every day. The driving force behind this ecosystem is its people: experts who truly understand the needs of innovative companies.

Why partner with WPT?

- **A comprehensive offering**
  From research and technology to infrastructure and consulting.
- **Access to experts**
  Technologists, analysts, quality specialists and digital transformation experts.
- **An ecosystem built for growth**
  Partnerships, clusters and a community of over 200 companies.
- **Effective support**
  We shorten time to market and reduce risk.
- **Nearly 30 years of experience**
  Working with businesses, academia and innovators.

Laboratories
at Wroclaw Technology Park

Wroclaw Technology Park offers flexible access to laboratories, equipment and specialist services, tailored to the needs of companies and R&D projects. We provide fully equipped chemical, biotechnology and electronics laboratories, a clean room zone, as well as a Colocation and Hosting Centre.

For smaller teams, shared laboratories are available, while companies scaling their R&D activities can access advanced equipment and expert services in analysis, metrology and prototyping. Everything in one place — with expert support and clear cooperation rules.

OUR OFFER

- **Laboratory spaces for rent**

We offer flexible laboratory spaces tailored to the needs of your research or business project. Whether you are building your startup or conducting advanced R&D activities, we provide a professional, fully equipped working environment.

- **Laboratory equipment for rent**

We provide access to specialist research and R&D equipment — without the need to purchase and maintain your own infrastructure. Use advanced technologies exactly when you need them.

- **Specialist services**

At Wroclaw Technology Park laboratories, we offer a wide range of research, engineering and prototyping services. Our technical infrastructure and experienced team enable the execution of complex analyses and experimental work — from microbiological testing to metal processing and 3D printing. Each service is delivered in a model tailored to the client's needs: flexibly, with full expert support and strict data confidentiality.

Offices and spaces
for rent

WPT offers offices as well as production and warehouse space for rent, tailored to the needs of companies at different stages of development – from startups to established enterprises. The rented space grows together with the company – you can start with a small office and expand the leased area as your business develops.

Tenants benefit from 24/7 access to buildings, technical and ICT infrastructure, conference rooms, kitchens, common areas, as well as surface and underground parking facilities for several hundred cars.

WHY CHOOSE AN OFFICE AT WPT?

- **24/7 access** – work at any time.
- **Security** – 24-hour monitoring and access control system.
- **8 conference and training rooms** – available to tenants.
- **Several hundred parking spaces for tenants** – surface parking at each building and 2 underground garages.
- **Restaurant in the ALFA building** – ideal for meetings and lunch breaks.
- **Modern infrastructure** – ICT and technical systems.
- **Proximity to laboratories and technology companies** – a business-friendly environment.

Conference
and training rooms

Organise your event in WPT's conference and training facilities. This flexible infrastructure works equally well for small, intimate meetings as well as larger conferences, training sessions or workshops.

WE OFFER:

- **3 conference rooms,**
- **4 training rooms,**
- **1 multifunctional room with capacity for up to 150 people.**

All rooms are equipped with multimedia equipment, high-speed internet access and air conditioning. Room layouts can be flexibly adapted to the nature of the event – from small meetings to large conferences.

Rooms can be booked online via WPT's dedicated reservation system.

Product development

WPT provides comprehensive support for the development and scaling of life science products. It offers both specialised services and ready-to-use infrastructure designed for companies operating in the food, cosmetics, and nutraceutical sectors. WPT supports enterprises that want to test formulations, create new products, or expand production capacity - all in compliance with HACCP, GMP, and ISO standards.

OUR OFFER

- **Technology line**

The Technology Line provides advanced facilities for the food, nutraceutical and biotechnology industries. We give companies access to dedicated space and a team of technologists who can help develop or test formulations, optimise processes and prepare products for market launch.

- **Supercritical CO_2 extraction**

WPT's R&D facilities enable the production of high-quality plant extracts using supercritical CO_2 extraction – one of the most effective and environmentally friendly methods used in the pharmaceutical, cosmetic, food and feed industries.

- **R&D laboratory**

The WPT R&D Laboratory is where ideas take shape, from the initial concept to a finished formulation. Our team of technologists supports companies in developing customised formulations based on their ideas and compliant with applicable regulations and quality requirements.

- **Technology and quality advisory**

We provide quality support for food, dietary supplements and other life science products, including formulation development, production technology, documentation, food safety training and regulatory guidance.

- **NUTRIBIOMED Cluster**

The NUTRIBIOMED Cluster is an integrated collaboration platform connecting science and business, focused on innovation in life science sectors, including functional food, dietary supplements, nutraceuticals and biomedical preparations.

Training centre
of Wroclaw Technology Park

Wroclaw Technology Park offers training delivered by experienced practitioners who combine expert knowledge with hands-on work in analytical and research environments. Courses take place at WPT and use specialist laboratory infrastructure, allowing participants to gain both structured knowledge and practical skills they can apply in their daily work. Programmes are tailored to different levels of experience and focus on learning by doing.

OUR OFFER

- **Training with up to 80% co-financing!**

Wroclaw Technology Park offers training courses eligible for funding through the Development Services Database (BUR). Companies, employees and individuals can receive up to 80% funding, depending on the available programme and funding operator. This makes it easier to plan team development and access specialist training tailored to real business needs.

- **Tailor-made training**

A solution for individuals and organisations seeking to develop skills required for a specific process or project. Each training programme is fully tailored to participants' needs.

- **Science workshops for primary and secondary school students**

Flexible formats

Our training courses are available in person, online and in hybrid formats, allowing companies to easily fit employee participation around work schedules and current team needs.

Certificates and tangible benefits

Participants receive certificates or official confirmation of attendance. The knowledge and skills gained support the development of both employees and the entire organisation.

Business incubation

At WPT, we support academic teams, startups and technology companies in developing innovations, from the initial concept and prototype to market launch. Our incubation system includes four pathways: academic, barrier-free, digital and R&D. Each is designed to meet the real needs of entrepreneurs and accelerate project development. It is a flexible, practical solution for those who want to test, develop and implement their ideas while minimising risk, with access to expert support, professional infrastructure and the WPT ecosystem.

WPT incubation participants can benefit from individually selected tools and services, including:

- office, conference and laboratory space,
- technological support,
- business consulting and training,
- access to the Technology Line,
- access to business networks and support programmes.

The results of WPT's incubation support are measurable:

- **over 380** companies incubated at WPT,
- **over PLN 4 million** in incubation support provided by WPT between 2015 and 2025.

Business support

WPT provides comprehensive support to SMEs and innovators, helping them grow their businesses and secure funding. WPT's services include de minimis aid, practical expert advice through the Business Information Zone, access to external funding through the Grant voucher, as well as specialist knowledge and networking opportunities within the Innovation sector.

OUR OFFER

- **Business Information Zone**

The Business Information Zone is a place where entrepreneurs receive free, practical support in running and growing their business – directly from experts representing business support institutions. In one place, you can get up-to-date information on EU funds, support programmes, intellectual property protection, hiring and labour law, as well as funding opportunities. It is a fast track to reliable knowledge and actionable guidance that helps your company grow without unnecessary barriers.

- **Innovation sector**

The Innovation sector is a hub of knowledge and practical support for companies looking to develop products, processes and competences based on the latest technologies. We combine practical tools with access to partnerships, creating an environment where entrepreneurs find solutions faster, build new connections and scale their business more effectively.

- **Grant voucher**

The Grant voucher mechanism makes it possible to begin the process of applying for EU funding through Wroclaw Technology Park. Under this mechanism, we support and finance the preparation of documentation required to apply for EU co-financing for R&D projects. It is aimed at entities that plan to use WPT laboratory equipment and other resources as part of their projects.

- **De minimis aid**

Wroclaw Technology Park secures funding from national and EU programmes and then channels it to companies working with the Park. Through our programmes, businesses can benefit from free or partially subsidised services that support their growth and innovation.

Designing the future

of resilient businesses and strong communities

At WPT, we support the growth of SMEs by providing more than just the right conditions for doing business. We also create initiatives that help entrepreneurs develop their skills, broaden their perspectives, build valuable partnerships and prepare more effectively for future challenges.

Future-ready business

Our initiatives include digital transformation projects such as WRO4digITal EDIH Wroclaw, as well as free support for entrepreneurs through consultations, webinars and meetings with experts representing various public authorities and institutions, delivered as part of the Business Information Zone. We also focus on the life science sector, bringing its stakeholders together through our coordination of the NUTRIBIOMED Cluster. In addition, we develop practical tools to support innovators as part of the Innovation Sector.

A strong society and modern education

We create opportunities for growth not only for companies, but also for local communities. We support education, accessibility and future skills because strong businesses need a strong environment in which to thrive.The Pro Mathematica Foundation, established by WPT, runs the Technoludek Education Centre and Preschool. Together, we deliver the Designing the future initiative, focused on education, cooperation between schools and their communities, and creating better development opportunities for children and young people. For several years, we have also organised the Innovation in Accessibility Fair, an event promoting solutions that improve accessibility.
